Product Description:

FCP Flexible Access Ladders are constructed of high strength webbing and 1 1/4" diameter round fiberglass rungs. Each rung is made up of two pieces of webbing running through the FRP tubing and sewn to the ladder riser. They are pinned in place using a stainless steel spring pin to keep the rung from rotating. Both ladder risers are constructed of 6000 Lb nylon webbing. Each ladder comes complete with two #354-2 carabiners. Multiple ladders can be joined together using carabiners on the end loops, or you can order a longer length, or custom length.

WL-20
(20' Web Ladder)

Material Specifications:

-Webbing:

1-3/4" wide Nylon webbing min tensile 6000 Lb, yellow

-Thread:

138# nylon filament black

-Rungs:

1-1/4" dia 1/8" wall fluted fiberglass reinforced plastic tubing

-Pins:

1/8" dia 18-8 Stainless Steel spring pin.

-Carabiner:

Formed alloy steel, plated, minimum tensile strength of 5000 Lbs. Gate has auto-twist locking mechanism.

*Maximum load capacity on the ladder is 310 Lbs.
